

# Liquor Counters

- The Counter System by ADP is specifically designed for the requirements of a small to medium liquor store operation
- Totally modular construction allows you to select the various units that you require and place them in a configuration to meet your needs and available space. Length of individual modules can be varied to your specific needs
- Choose from basic open shelving modules to lockable drawers for cigarette storage or cabinets with glass front display for miniatures or valuable merchandise
- Once you have your layout established, we program the sizing and provide all of the remaining components – front panels, counter tops and base plinths - to bring your project together
- Modules are delivered fully assembled, with a custom-manufactured ladder frame. This allows for simple site installation while providing open space underneath the cabinet to run electrical cables, etc

Counter Components

1. Cupboard module (includes open top shelf for cash drawer, paper bags, etc.)
2. Bank of 3 drawers, with single lock. Includes open top shelf
3. Corner shelving module, with open adjustable shelves
4. Optional double-action swing doors
5. Counter top - choose from our standard heavy-duty flooring vinyl top or selected laminate finishes

Here are the simple steps to ordering your liquor counter:

1. Send through your required counter layout with the different modules.
2. Select the cabinet colour. Standard colour – BLACK melamine.
3. Select the top finish. Standard finish Grey-patterned hard wearing vinyl with 3mm thick aluminium edging.
4. Select the plinth finish. Standard finish – BLACK
5. Select additional specific features required. For example, we can provide double-action swing doors to clearly delineate the counter area while providing easy access to customer service staff.
6. You can select from the standard plain front or use this area to provide a fully-functional selling area with shelving or hangsell for cross-merchandising opportunities.

Premium Wine Unit
