

# Produce Displays

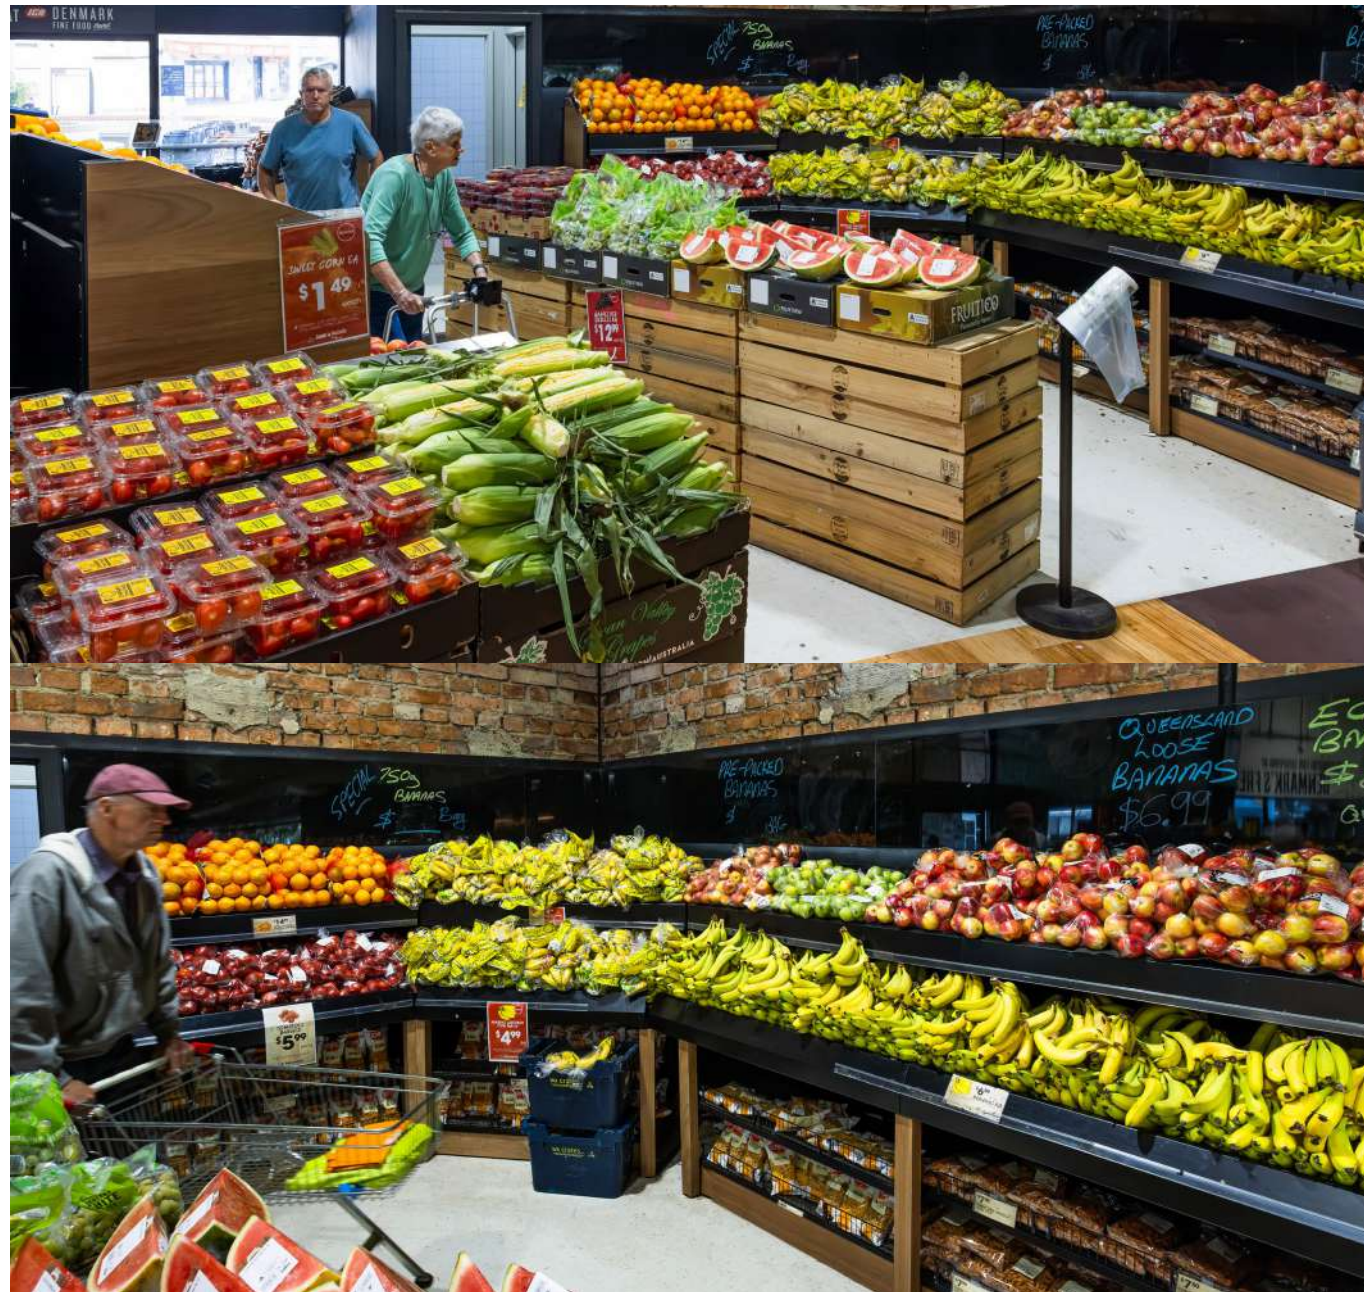

## Produce Bunks Introduction

**ADP's Produce Bunk concept is a series of modular pieces, that come together to form a Produce Display that is perfectly tailored to each store.**

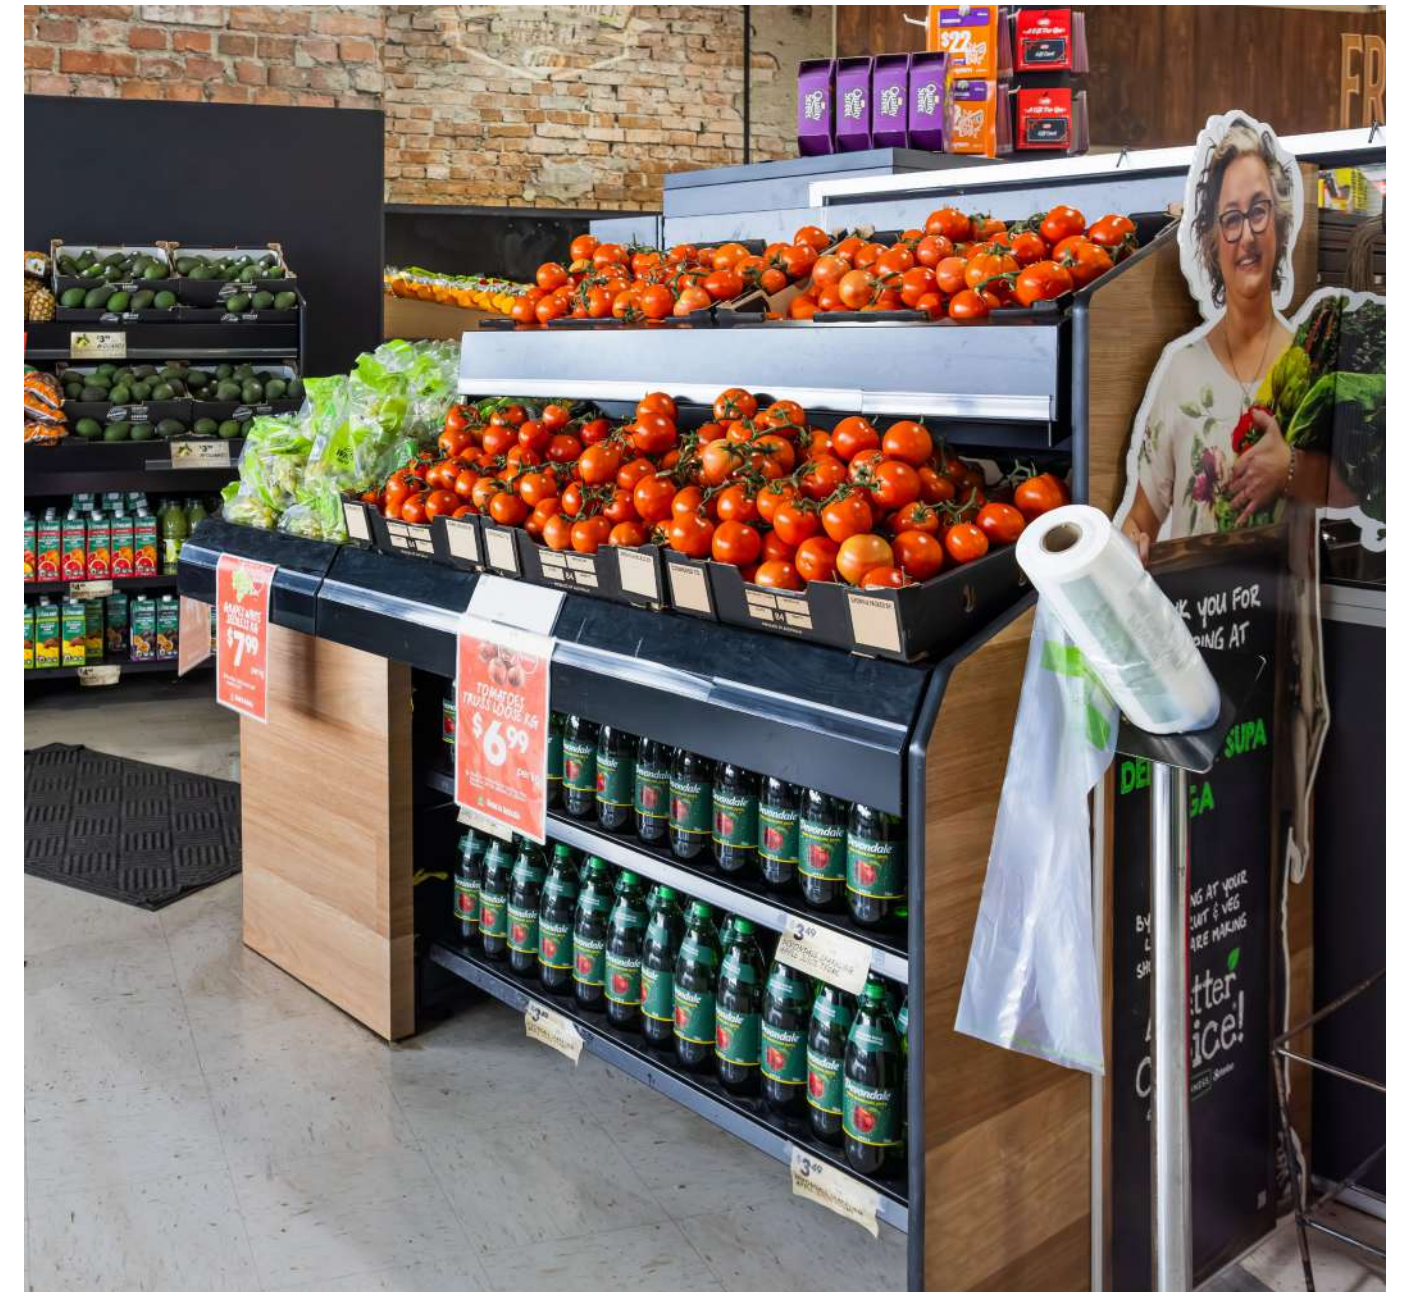

Designed to make your range stand out for it's freshness, our Produce Bunks draw the eye to the merchandise and form a seamless shopping experience for your customer.

From a Store Manager's perspective, each module is flexible and can be adjusted to meet the requirements of seasonal changes and weekly adjustments in stock levels. The lower part of each module can be used as a capacious storage area for bulk stock, or as additional display for more selling opportunities.

## Produce Bunks Benefits

- The ADP Produce Bunk design provides you with a systematised, modular approach for quality presentation.
- Many decor options are available- from solid timber in raw or stained, hard-wearing vinyl planks or laminates, enabling you to create the perfect design for your store.
- Powdercoated metal front shelf lip suitable for applying magnetic ticketing strip.
- Create the perfect Produce Display to suit your space. The modular design achieves commonality for double-sided (island) displays, single-sided (wall) displays, in addition to internal and external corner options.
- Easily shipped, with greatly simplified installation on-site compared to traditional timber produce displays.
- Use space below as a high-capacity bulk storage area, or as additional display area for increased sales.

Produce Bunks Overview

Produce Bunks Overview

1 Choice of Single or Double Tier

2 Flat or Pyramid (Angled) End Bays

3 Timber infill panels in colour of your choice

4 Internal and External Corner Options

5 Raised shelf lip to retain crates (suitable for use with magnetic price label holders)

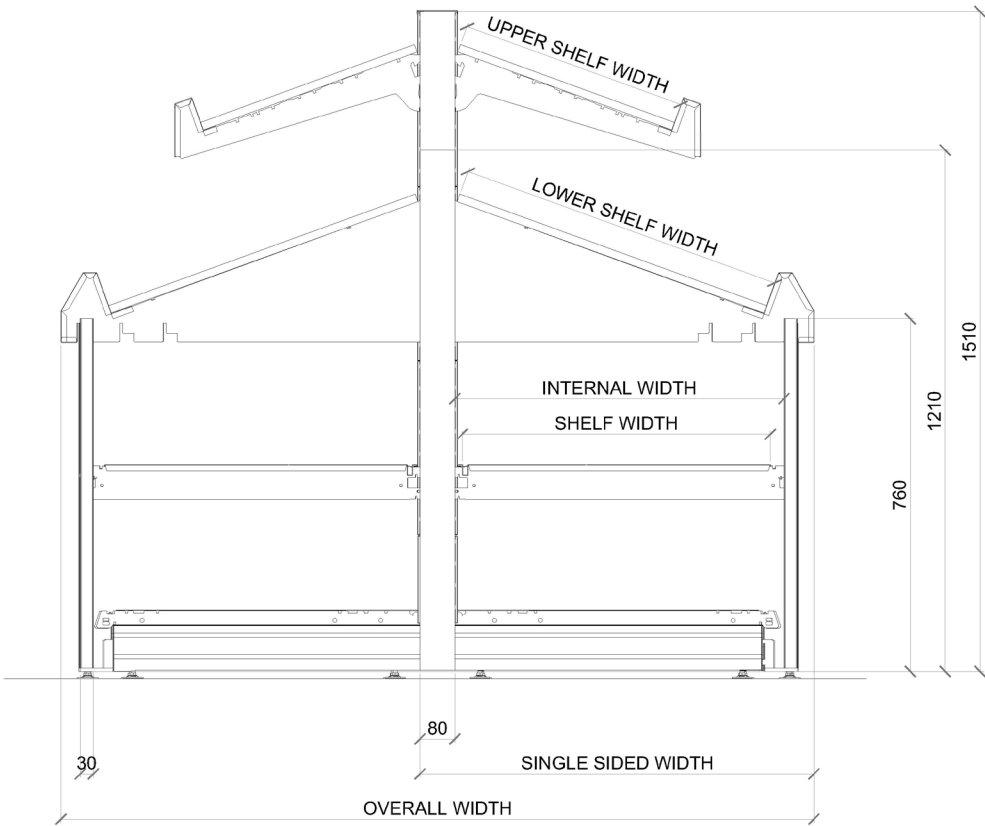

6 Shelves underneath Produce Display offer high-capacity bulk storage or additional display opportunities (timber infill panel available as an option).

7 Replaceable Graphic Backpanel Option
